Big Analytics Skills Enablement Initiative to Bridge the Skill Gap in Asia

The companies are revolutionizing at a fast pace delivering high-end products to their clients thanks to the emergence of big data. This is paving the ways for aspiring professionals wanting to make it in this arena. Though there are new career avenues awaiting skilled individuals, having mere knowledge about the big data technologies does not lead to anywhere. This is an extension of Cloudera's recently introduced Big Analytics Skills Enablement (BASE) Initiative, an industry-led ecosystem designed to groom a future workforce of data professionals in Malaysia.

Cloudera, in particular, is an excellent choice given its focus on Hadoop-based big data solutions as well as the key people and stakeholders behind its phenomenal rise. Cloudera Certification establishes you as a trusted and valuable resource for organizations looking to work with an Apache Hadoop expert, giving you a clear advantage and establishing you as a leader in the rapidly growing big data space.

Embrace Power of Open Source Connectivity

Candidates who are currently holding the following certifications, you are entitled to special price for Cloudera training courses

Microsoft Developer	CDTSH
Microsoft Database Administrator	CDAT
Microsoft Windows Server	CCAH
Red Hat Systems Administrator	CCAH

} Recommended Cloudera Path

Administrator Path

CCAH

Administrator Training for Apache Hadoop

10 - 13 July • 14 - 17 August

Learn system administrator concepts and practices for Hadoop, from installation and configuration to load balancing and tuning to diagnosing and solving problems in your deployment.

Audience:
System Administrators and IT Managers
