

Module Title : Course ITIL® v3 Service Offerings and Agreements Capability (SOA)

Duration : 5 days

Course Description

This 5-day course immerses learners in the practical aspects of the ITIL® v3 Service Lifecycle and processes associated with the Service Offerings and Agreements of services and service delivery. The main focus of this course is on the operational-level process activities and supporting methods and approaches to executing these processes in a practical, hands-on learning environment. This training is intended to enable the holders of the certificate to apply the practices during the Service Management Lifecycle. This course is designed using an engaging scenario-based approach to learning the core disciplines of the ITIL best practice and positions the student to successfully complete the associated exam.

Audience

The Service Offerings and Agreements Capability course will be of interest to:

- Individuals who have their ITIL® v3 Foundation Certificate (or the ITIL® v2 Foundation + v3 Foundation Bridge certificate) who want to pursue the intermediate and advanced level ITIL certifications.
- Individuals and / or operational staff who require a deep practical understanding of the Service Offerings and Agreements processes and how these may be used to enhance the quality of IT service support within an organization, for example: operational staff involved in Service Portfolio Management; Service Catalogue Management, Service Level Management, Demand Management, Supplier Management, Financial Management and Business Relationship Management
- IT professionals involved in IT Service Management implementation and improvement programs.
- A typical role includes (but is not restricted to): IT professionals, IT / business managers and IT / business process owners, IT practitioners.

Learning Objectives

Upon completion of this course and examination, the learner will gain competencies in:

- Understanding Service Management as a Practice and how the processes within Service Offerings and Agreements support the Service Lifecycle
- Knowing the important role of Service Offerings and Agreements in service provision and understanding of how the in-scope processes interact with other Service Lifecycle processes
- The activities, methods and functions used in each of the Planning Protection and Optimization processes
- The activities, methods and functions used in each of the Service Offerings and Agreements processes
- The application of Service Offerings and Agreements processes, activities and functions to achieve operational excellence

- How to measure Service Offerings and Agreements performance
- The importance of IT Security and how it supports Service Offerings and Agreements
- Understanding technology and implementation requirements in support of Service Offerings and Agreements
- The challenges, critical success factors and risks related with Service Offerings and Agreements
