Phone Gap Mobile Development

About the course

Adobe PhoneGap is a standards-based, open-source development framework for building cross-platform mobile apps using HTML, CSS and JavaScript for iOS, Android™ and Windows® Phone 8.
Learn how to make smart design plans based on the capabilities of mobile JavaScript and work hands on with the tool chain for creating PhoneGap apps for mobile platforms. To join this course, familiarity with HTML, CSS and Javascript are required, for you to build upon that knowledge with incorporating features of Cordova.js.

Our Speaker

Selva

Selva is well known in the industry as an experienced software developer with extensive knowledge in various development areas.
Selva has over 13 years of experience in software application development, web application development, database programming, and technical training for government and corporate sector. Since 2011, Selva started focusing on Android, Microsoft SharePoint, Content Management Server (now Microsoft SharePoint Web Content Management), Commerce Server, BizTalk, Microsoft Dynamics CRM, Microsoft Dynamics AX and Oracle. Selva has used advanced Internet programming techniques to link business databases (MySQL, SQL Server, and Oracle) and websites, providing improved service, sales, and knowledge to business customers. Selva also have developed mobile web applications using advanced JavaScript and HTML 5 on the front-end with Java, ColdFusion, and PHP on the backend.

Key Takeaways

Build mobile JavaScript applications using jQuery Mobile.

Course Breakdown

Lesson 1 : Introduction to PhoneGap
Lesson 2 : PhoneGap Development, Testing, and Debugging
Lesson 3 : Configuring an Android Development Environment for PhoneGap
Lesson 4 : Configuring an iOS Development Environment for PhoneGap
Lesson 5 : Configuring a Windows Phone Development Environment for PhoneGap
Lesson 6 : Using PhoneGap Build
Lesson 7 : Accelerometer
Lesson 8 : Camera
Lesson 9 : Capture
Lesson 10 : Compass
Lesson 11 : Connections, Contacts, Geolocation, Media Devices, Storage, SQL Database

RM420 PER PERSON

1-3 NOV 2017
9AM - 5PM

GUIDANCE VIEW SDN BHD
5-5 & 7-5,
The Boulevard
Mid Valley City,
Lingkaran Syed Putra,
59200 Kuala Lumpur.

What you will learn

This 2-days course will focus on the core technologies behind Internet of Things. It leverages and explores the infrastructure, communication, sensor technologies, networking technologies, data/storage/analytics and security aspects of IoT in building the next-generation computing realm, which makes a world fully connected.

After the course, participants will have a good understanding of the different pieces of an IoT system and how they interact.

Course Modules

Module 1: Introduction to IoT
Module 2: Overview of IoT
Module 3: Components & Elements of IoT
Module 4: Architecture of IoT system

At the end of the course

- Understand the concepts of IoT and its impact on business & government organizations
- Understand the various components and architecture of IoT
- Understand the role of cloud computing (deployment and service models, architecture, private cloud infrastructural concerns, security and privacy concerns) in IoT

Workshop details:

Date : 27-28 November
Time : 9am – 5pm
Venue: Iverson Associates Sdn Bhd
Suites T113-T114, 3rd Floor, Centrepoint
Lebuh Bandar Utama, Bandar Utama
47800 Petaling Jaya, Selangor

RM 588
Per Person

Terms & Conditions
1. This promotion price is valid for training dates as above only.
2. This training is due for confirmation based on minimum 6 pax to commence the class.
3. Price exclude 6% GST.
4. Iverson reserves the right to amend the terms & conditions without giving prior notice.
