Course Outline :: AD371::

Module Title : AD371- Red Hat Decision Manager and Process Automation Manager for

Business Users

Duration : 2 days

Overview

Red Hat Decision Manager and Process Automation Manager for Business Users (AD371) teaches the core concepts and foundational skills necessary to make the most of Red Hat® Decision Manager and Red Hat® Process Automation Manager as a business user. You will learn to navigate the improved user interface for Decision Manager and Process Automation Manager, as well as how to design basic rules and business processes and define foundational case management concepts.

This course is based on Red Hat® Enterprise Linux® 7.5, Red Hat Decision Manager 7.0, Red Hat Process Automation Manager 7.0, and Red Hat® OpenShift® Container Platform 3.9.

Many organizations are interested in undergoing a digital transformation from traditional applications to process-driven applications. With Red Hat Decision Manager and Red Hat Process Automation Manager 7.0, Red Hat has introduced solutions to empower business users to develop and manage business rules and processes in a low-code environment.

Course content summary

- Author decision tables.
- Navigate the user interface for Decision Manager and Process Automation Manager.
- Develop business processes with Business Central.
- Design forms with Form Modeler.
- Navigate and test a case management project.

Learn about data objects and process design, as well as how to design forms with Form Modeler.

Case management with Process Automation Manager

Walk through an overview of case project navigation.

Outcomes

Impact on the organization

Only 37% of most typical business processes have been digitized. By automating, adapting, and redesigning business processes, organizations can modernize their portfolio, empower employees, engage customers, and innovate their products. Red Hat Decision Manager and Red Hat Process Automation Manager are central to running and designing process-driven apps. These technologies enable both developers and business users to automate business processes and business decisions in a low-code environment. This course is intended to give business users hands-on experience with process-driven applications and insights into how to use both Decision Manager and Process Automation Manager to catalyze their organizations' digital transformation.

Impact on the individual

As a result of attending this course, you will understand the basic concepts of process-driven applications and how to develop basic rules and processes. You will also learn how to run and test applications with Decision Manager and Process Automation Manager.

You should be able to demonstrate these skills:

- Develop rules using decision tables.
- Navigate and create projects using Decision Central.
- Design a business process in Business Central.
- Navigate and test a case management project.
