

Module Title : MB-200T04-A: Dynamics 365: Power Platform Test and Deploy

Duration : 1 day

Overview

The Microsoft Power Platform helps organizations optimize their operations by automating routine tasks and standardizing best practices. This training provides a high-level overview of the capabilities of Microsoft Dynamics 365 and the Power Platform and provides a foundation for other Microsoft Dynamics 365 and Power Platform training offerings.

Join our globally recognized experts as they guide you through the managing your solutions and their deployment.

Audience profile

A Dynamics 365 Customer Engagement Functional Consultant is responsible for performing discovery, capturing requirements, engaging subject matter experts and stakeholders, translating requirements, and configuring the solution and applications. The Functional Consultant implements a solution using out of the box capabilities, codeless extensibility, application and service integrations.

At course completion

After completing this module, students will be able to:

- Enable and update first-party applications.
- Install third-party applications.
- Configure managed and unmanaged solutions.
- Update and patch solutions.
- Distribute solutions.

Course Outline

Module 1: Manage Instances and Applications

In this module you will learn how to enable and update first-party applications; install third-party apps and configure using admin portals.

Lessons

- Overview
- Manage applications
- Module summary

After completing this module, students will be able to:

- Enable and update first-party apps.
- Install third-party apps.

Module 2: Manage Solutions

In this module you will learn how to create manage and deploy solutions.

Lessons

- Solution concepts
- Planning and creating solutions
- Working with solution components
- Distributing solutions
- Working with managed solutions
- Module summary

After completing this module, students will be able to:

- Create, manage and deploy customizations with solutions.

Module 3: Additional Deployment Considerations

In this module you will learn how to configure for mobile and deploy components such as Microsoft Flow.

Lessons

- Configure
- Mobile configuration settings
- Mobile configuration
- Module summary

After completing this module, students will be able to:

- Configure for mobile.
- Deploy components.

Module 4: Documentation and Testing

In this module you will learn how to design test plans and perform performance tuning.

Lessons

- Creating test plans
- User interface testing
- Performance optimization and tuning
- Documentation
- Engage with the customer

- Module summary

After completing this module, students will be able to:

- Create and use test plans.
- Locate performance tuning tools.

Prerequisites

Familiarity of business applications and the desire to customize and implement them for your business.
