

Module Title : Big Data Foundation Masterclass

Duration : 2 days

Overview

IT training providers will need to meet Big Data competence development demands in South-East Asia. The Big Data Foundation Masterclass prepares instructors to deliver the CCC Big Data Foundation (BDF) course. EXIN South-East Asia and CCC Accredited Courseware Provider, ITpreneurs, have joined forces to host this exclusive masterclass for trainers. The session will be led by Chief Data Strategist and Big Data Foundation author, Mario Bojilov.

Big Data is becoming an increasingly critical success factor for organizations globally. We've advanced to digital, information driven, societies where data is in abundance. Identifying, analysing and managing core information for organizations in the abundance of data is becoming more difficult and fundamental for success. Whether your clients are dealing with truly Big data, or a more manageable volume of data, the need for Big Data knowledge and skills is forecasted to grow in the coming years to address this gap.
