Module Title	:	**MB-200T03-A: Dynamics 365: Power Platform Integrations**
Duration	:	**1 day**

Overview

The Microsoft Power Platform helps organizations optimize their operations by automating routine tasks and standardizing best practices. This training provides a high-level overview of the capabilities of Microsoft Dynamics 365 and the Power Platform and provides a foundation for other Microsoft Dynamics 365 and Power Platform training offerings.

Join our globally recognized experts as they guide you through the various integration options available, and how to use them in real-world scenarios.

Audience profile

A Dynamics 365 Customer Engagement Functional Consultant is responsible for performing discovery, capturing requirements, engaging subject matter experts and stakeholders, translating requirements, and configuring the solution and applications. The Functional Consultant implements a solution using out of the box capabilities, codeless extensibility, application and service integrations.

At course completion

After completing this course, you will be able to:

- Identify key integration scenarios.
- Configure and use integrated email.
- Configure and use Outlook integration.
- Configure and use additional Office integrations.
- Import and export data.

Course Outline
